

1811/1813 Body Pack and Headband Microphone

A headband microphone and body pack transmitter for use with Coomber wireless ready UHF products.

Features

- Four selectable channels, licence free.
- 9V Battery, gives 10 hours of quality performance.
- Gives up to 100 meters range.
- The headset has been designed primary with the aerobics industry in mind and is therefore built to withstand the everyday rigours of an active lifestyle.
- The construction of this headband microphone offers a high degree of protection against the ingress of sweat. Precise placement is obtained with the 4mm diameter flexible gooseneck and the condenser capsule is highly efficient at noise cancellation - helping prevent feedback or interference or from crowd noise etc.

You can

- Adjust the headset so its comfortable for a long period of use, but remains securely in place .
- You can select 1 of 4 channels so that you do not interfere with another user of similar equipment close by.
- You can also adjust the gain if the signal is too high causing feedback, but this microphone is designed to be highly efficient at eliminating feedback.
- When using a Coomber public address amplifier such as a 2070 you can clearly talk over the audio being played.
- Quickly change a battery

Technical Specifications:

Weight: 90g

Dims: 102(h) x 62(w) x 31(d) mm

Power Output: NA

Current consumption;50uA
