

44583 PA Combo with Bluetooth Receiver & CD Player

You can

- Bluetooth receiver built in so you can connect it wirelessly to iPad, tablet or computer and control from across the room.
- Use this in rooms and halls, enabling a microphone to amplify voices or connect musical instruments (i.e. keyboard), or other external source (iPod / Mp3 player hi-fi, mixer desk, PA).
- Plug in an iPod or similar device or a laptop and amplify it. Great when you are presenting a slide show or presentation as you can talk over the sound track without raising your voice but still be confident of being heard clearly by all.
- Use the remote control functions of the CD player to give better control and flexibility of use.
- Obtain many different accessories to enhance and customise this unit to your exact requirements, such as stands, bags, microphones, etc. just call us and tell us what you need and we will advise the best parts & prices.

*** Please note the CD Player may be different from the one in the images.**
