**Metal Case** Strong, sturdy, lightweight and long lasting case

**CD Drive** Variable speed CD to speed up or slow down playback any music or speech, great for listening to languages and background music

**USB Socket** Connect a USB memory stick to play MP3s or WAV files or use the variable speed to slow down or speed up

**SD Card slot** Variable speed gives ideal storage and playback for your music MP3 library

**Power Supply Connection** 24V DC from a Coomber 1858 to power and recharge your unit. With its internal battery its great to take anywhere without worrying about connecting to mains power

**Power On/Off** simple soft touch button with blue LED lit when the unit is switched on

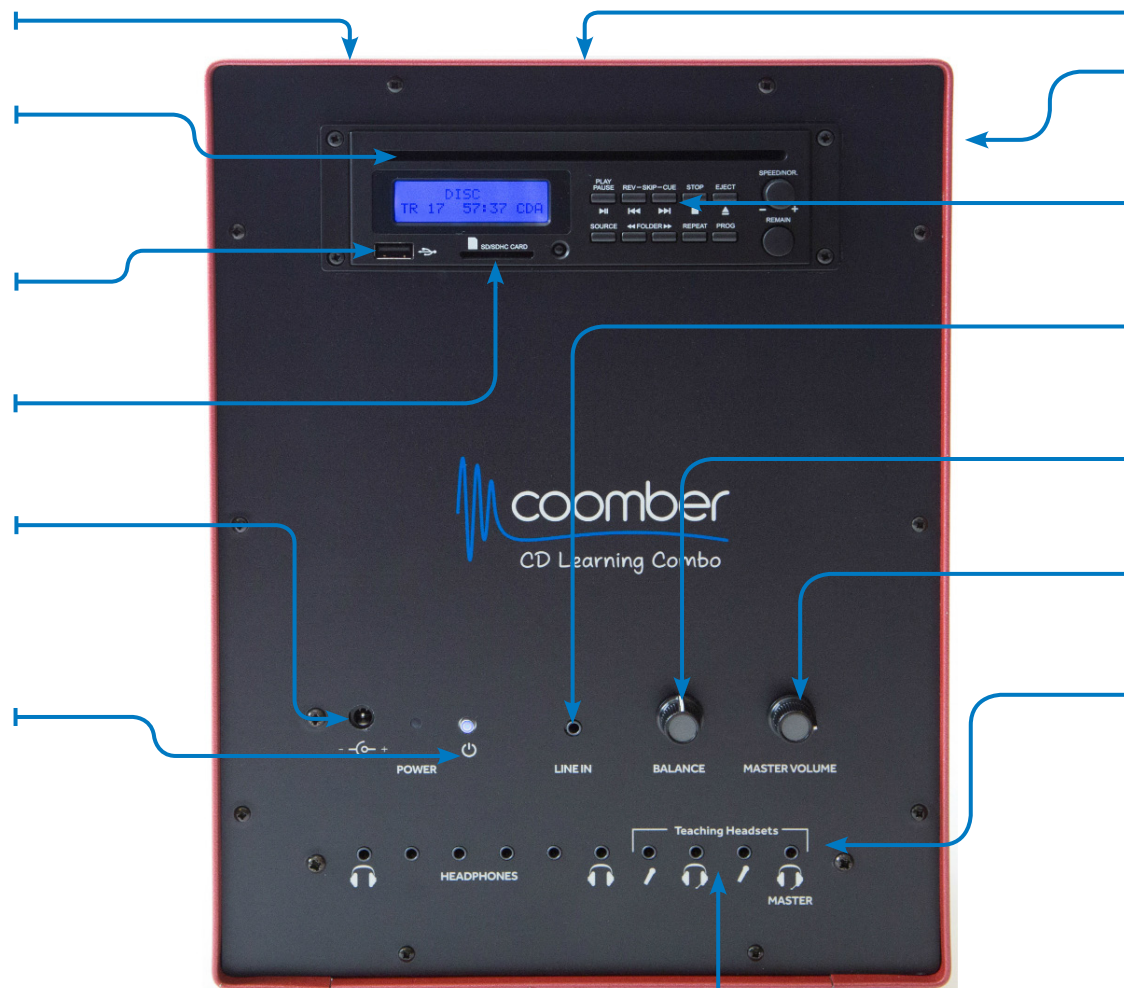

## Ideal Accessories

41330A

41390

**Handle** for carrying with comfort and ease

**Speakers** class facing stereo speakers giving clean undistorted sound to a group of students

**CD Menu Buttons** Play/pause, previous and next track all in one area in a familiar layout. CD unit also comes with a free remote control

**Audio line in Socket** Use to amplify iPod, iPad Tablets, Laptops etc so turn your tables into a listening centre

**Balance** allows separation of tracks-special CDs have music and spoken words on separate channels

**Master Volume** WARNING: It is always best practice to turn down the volume prior to connection of headphones

**6 or 8 Headphone sockets** for quiet group listening, also prevents ambient noise distractions. The master socket mutes the speakers

**2 Headset Sockets** for either one to one mentoring or teacher intercom to students headphones, this allows you to reinforce the learning.
